

**NATURALLY
SAFE
TO CONSUME**

As **TIMELESS™ TOMATO** is made from 100% natural NonGenetically-Modified Tomato and is Preservative-Free, there are no side effects and is absolutely safe to consume. Carotenoids in PhytoFLORAL® do not contain any visible colour and will not affect the skin's natural colour but will instead lighten pigmentation when consumed.

TIMELESS

A GIFT OF TIME

BRIGHTENS • WHITENS
RADIANCE FROM WITHIN

TIMELESS TOMATO is an enriching supplement with 100% premium, natural ingredients that protects and maximizes our skin's health and overall body wellness from within. TIMELESS TOMATO is a catalyst made from a special varietal of 100% natural Non-Genetically-Modified Tomato and is Preservative-Free.

PRIME ACTIVE INGREDIENT

PhytoflORAL® is our main ingredient used in our unique formula of TIMELESS™ TOMATO.

The colorless carotenoids from PhytoflORAL® gives TIMELESS™ TOMATO its brightening and whitening source of power together with UVA/UVB protection, anti-inflammatory and anti-oxidant capabilities to achieve the best skin supplement.

GRAPE SEED EXTRACT

According to the University of Maryland Medical Centre, **grape seed extract** has been used for centuries to treat

numerous conditions. It contains several plant compounds, one of which includes OPCs, which are powerful antioxidants. OPCs in grape seed extract contain 20 times the antioxidant power of Vitamin E and 50 times the antioxidant power of Vitamin C. The report, published in the *Winter 2003 issue of "Journal of Medicinal Food", states that grape seed extract can protect the body from sun damage. Researchers claim that grape seed extract benefits the skin's appearance by bonding it with collagen and maintaining skin cell health together with the skin's elasticity

77%	IMPROVEMENT OF SKIN TEXTURE	100%
77%	DECREASE IN SKIN PIGMENTATION	82%
64%	SKIN LIGHTENING	73%

ADDITIONAL ELEMENT

L-cysteine, an amino acid which functions as a building block of proteins is also added in our unique formulation. L-cysteine helps to boost the liver's production of Glutathione, commonly coined as the "mother of all antioxidants" to maintain overall body wellness. L-cysteine is also valued for its ability to increase Glutathione levels in the body in which without Glutathione, cells will die at a faster rate, leading to quicker ageing.

However, Glutathione - taken orally or applied topically - is not absorbed by the body. By adding L-cysteine into the formula, transformed Glutathione by L-cysteine will be absorbed by the body and is activated to produce its own Glutathione to improve the overall appearance of the skin.
